

## Replacement UV lamps for Fujifilm printers

TCS Technologies manufactures digital UV curing lamps for virtually all Fujifilm printers. Printers are divided into two categories: older (low volume) printers use a cassette style bulb (Subzero 085H) while newer high-production printers use a field-replaceable lamp with black connectors. Our lamps are 100% compatible with OEM product at a fraction of the cost.

Like most technology-based items, our list of Fujifilm lamps is updated continuously. If your lamp is not listed, contact TCS Technologies for the latest cross-reference information.

**As of this update, we have produced UV curing lamps for the following Fujifilm printers:**

Compare curing performance, price and warranty; you will see why TCS Technologies' UV lamps compare favorably to the Fujifilm OEM offering.

- Our lamp is directly interchangeable with OEM product
- Our lamp is fabricated from the finest USA quartz and components
- Our lamp operates the same power level as OEM product
- Our lamp cures at the same rate
- Our lamp costs less

Purchasing a lamp from the OEM does not guarantee you get a better quality part. TCS Technologies provides an equivalent UV bulb at a fraction of the cost.
