

## Vzero 085D UV Inkjet Lamps

Another very popular UV inkjet lamp, the Vzero 085D is a spectral-cousin to the Vzero 085A UV lamp. It is used primarily on Agfa Anapurna printers. Ceramic end cap and wire leads are identical. The Vzero 085D is not as popular as the Vzero 085A owing to shorter lamp life and higher cost. UV output is very high; however, the lamp can be temperamental when operated at low power.

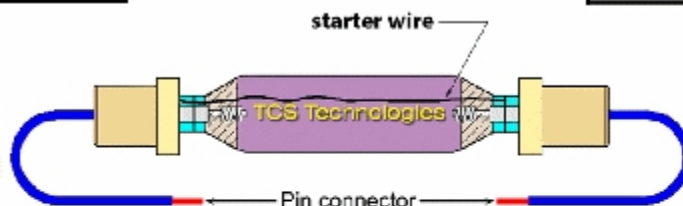

Compare curing performance, price and warranty; you will see why TCS Technologies' Vzero 085D lamps compare favorably to the OEM.

- Our lamp is directly interchangeable with OEM product
- Our lamp is fabricated from the finest USA quartz and components
- Our lamp operates the same power level as OEM product
- Our lamp cures at the same rate
- Our lamp costs less

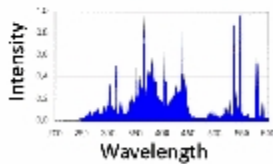

UV lamps are the main consumable item of your printer. Let TCS Technologies reduce your cash-outlay without sacrificing curing performance. Since 1979, we have manufactured quality UV curing lamps right here in the USA. No order is too small and we ship worldwide. Our lamps are reliable and backed by 32-years of lamp-making excellence.
