

H700 UV Inkjet Lamps

Our H700 is a high powered UV curing lamp used in EFI Rastek Daytona machines. Unlike the Chinese lamps oftentimes found in these printers, our lamp provides consistent UV output and predictable life. Our lamp is directly interchangeable with OEM product. We also produce a version of this lamp with increased UV (UVA) output. It is also interchangeable with EFI Rastek Daytona printer. Details are under the H700 Rev 2 link.

Lamps are produced from the finest USA sourced materials. We ship worldwide and no order is too small.
