

# PM7340 UV Inkjet Lamps

Designed for use with Inca Columbia Turbo, the PM7340 is one of the longest arc lamps in the digital UV industry. Lamp mounts via what we call a “tombstone” ceramic base. Care must be taken when installing lamp as base is heavy and lamp can snap.

We suspect this printer is no longer manufactured; however the Inca Columbia Turbo replacement lamp lives on at TCS Technologies.

Your Inca printer represents a substantial investment in digital printing. We have helped numerous manufacturing and printing companies to better manage their technology investment. Let us help attain your goals of success and growth with cost-effective Inca replacement digital printing lamps.

Since 1979, we have manufactured quality UV curing lamps right here in the USA. No order is too small and we ship worldwide. Our lamps are reliable and backed by 32-years of lamp-making excellence.

Keep in mind, just because a lamp is from a second source does not mean inferior quality. TCS Technologies actually manufactures the lamps we sell. We are not a reseller of Chinese lamps. Our lamp quality is equal to or greater than the OEM. You receive the same quality, USA-manufactured product at a fraction of the cost.
