------------------	------------------

Over the past few years GEW UV systems have made great inroads in the narrow-web label market. Lamp assemblies are compact and reliable. From a lamp-design standpoint, we are not a fan of several high current lamp designs. They tend to blacken early and short seal lengths crack easily. Care must be taken when handling GEW-style lamps. The ceramic is heavy and can easily snap the pinch seal.

**Our GEW-style lamps include:**

<b>1416-AFCD</b>
