

UV Curing Lamps For Giardina

Giardina manufactures UV roll-coating and UV conveyor dryers for the wood finishing industry. Like Cefla, many Giardina UV lamps are gallium iodide design for curing white-pigmented coatings. These are paired with mercury lamps to enable thorough cure over a wide variety of coatings.

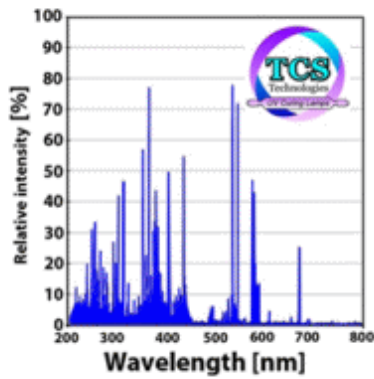

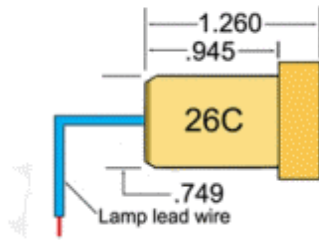

TCS Technologies offers a complete line of replacement lamps for Giardina equipment.
Here is a partial list of the lamps we manufacture:

2478	CK1500	6559AP41	1400/Max
1400MCX/TR	1400MC/TR	2-1678	2-1330
6612IP41	270302	011172TR	111140000000E
