

UV Curing Lamps For Integration Technology Equipment

Integration Technology is a main player providing UV curing equipment to the digital printing industry. From an equipment standpoint they produce a quality product. Lamps utilized are segregated into two types; Subzero (cassette style with fixed lamp) and Vzero with user replaceable UV lamp.

We are not sure from whom or where the OEM lamps are manufactured; certainly not by elves in Sherwood Forest. From the looks of the latest generation of OEM lamps, we believe the Far East is the likely candidate.

Additional information about replacement lamps for Integration Technology equipment can be found under the ***UV Inkjet lamp*** button of this website.

Buying a lamp from the OEM does not guarantee you get a better quality part. TCS Technologies provides an equivalent UV bulb at a fraction of the cost

Replacement TCS Technologies lamps for Integration Technology equipment include:

Subzero 055A	Subzero 085A	Subzero 085D	Subzero 085H
Vzero 085A	Vzero 085D	Vzero 140D	Vzero 140H
Vzero 170D	Vzero 171D
