

UV Curing Lamps For Kammann Equipment

Kammann is industry leader in graphic screen printing. They have an excellent reputation in providing cost-effective specialty decorating equipment.

UV curing plays an important role in the Kammann line of CD/DVD, plastic bottle and glass printing machines. Using UV curing, they provide high-definition contour lines, eliminate wasteful labels and insure brilliant color in a high-production environment.

One core component of many Kammann machines is a UV curing lamp. TCS Technologies manufactures a complete line of UV curing lamps for Kammann equipment.

Here is a partial list of replacement Kammann lamps we produce:

717231501000	M200U/A (3000 watts)	717231565000	MC200 (1800 watts)
KMSI 717231501000	KMSI 300231501000	UVH MC200	300231565000
200MC/A	Type A	UVL-200U	TQH33025
30023153100	PM21620	300231531000	717231531000
