

UV Lamps For UVT—Mark Andy

At one time UVT was a manufacturer of UV curing equipment for the narrow-web label market. Like everything else, times change. We believe they no longer produce equipment rather are relegated to selling aftermarket supplies to the UV printing industry. They are presently owned by Mark Andy and may indeed only sell via Mark Andy sales channels.

Mark Andy is a respected, long time manufacturer of reliable narrow web flexographic presses. They incorporate many different types of UV systems on their presses. We can count at least 5 different OEM UV-dryer providers to Mark Andy.

Replacement UVT Mark Andy UV curing lamps include the following:
