

# UV Curing Lamps For M&R Equipment

M&R produces numerous types of UV curing dryers. Included are several stand-alone belt dryers: Switchback, Vitran II, Lab-6 and Lab-12. Of the belt dryers by far the most popular is Vitran II

Carousel equipment is also produced with inter-station UV dryers. Models include Conquest, Insignia and Insignia B-Zero.

Finally, an inline press, Processor II, utilizes long arc UV curing lamps.

TCS manufactures replacement curing lamps for most M&R Equipment. Our lamps are directly interchangeable with the OEM bulb. You receive the same quality, USA-manufactured product at a fraction of the cost.

Compare curing performance and price; you will see why TCS Technologies' curing lamps compares favorably to OEM bulb.

- Our lamp is directly interchangeable with M&R OEM product
- Our lamp is fabricated from the finest USA quartz and components
- Our lamp operates the same power level as OEM product
- Our lamp cures at the same rate
- Our lamp costs less
